

Status Report 5:

Section 1:

Things we will do the following week

- Finish a version of our project with the baseline features.
- Submit it as a zip folder
- Update our product backlog to reflect the current status of our project
- Option/Bonus work
 - Work ahead on additional features once the baseline ones are done.

Section 2:

Things we have done this week, What worked, What you learned, Where we had trouble and what were stuck on.

- We finished the basic layout to the website
- Discussed what we want on our website
- Update our product backlog to reflect the current status of our project and include a screenshot in our project document
- Scoped and distributed work to respective team members.
- Define the models we will need in our application. Including all model attributes and model attribute data types.

Section 3:

Things we will do the following week

- Further develop the project with more polished baseline features
- Continue the completion of our project by implementing remaining features
- Touch base with team members throughout the project creation process.

Section 4:

Agenda

- Tuesday - meet at class gather and talk to TA
- Wednesday - meet as a group to discuss weekly events
- Thursday - meet up again in gathertown and talk to TA for updates.
- Friday - meet up as a group again to finish any assignments for the week.
