**Status Report 1:**

N/A (first one)

*Section 2:*

Things we have done this week, What worked, What you learned, Where we had trouble and what were stuck on.
- Got to know each other in the group
- Created Trello accounts and made a shared board
- Created a backlog on Trello
- Created a shared repository
- Decided on who the team leader was going to be
- Decided on team roles
- Added 10 features that we might want to add to our product
- Decided on the 12 features we are going to add to our product
- Created user stories for each feature we wanted to add to our product
- Started mapping prototype SQL database schema

*Section 3:*

Things we will do the following week
- Address any features in our product that could be misused and how we plan to guard against misuse
- Decide on a tool to use for creating mockup prototypes of the user interfaces.
- Design the pages for our app as Lo-Fi UIs using any tool
- Create a storyboard with our pages by adding arrows from one page to another to show the path from one page to another
- Update our product backlog to reflect the current status of our project and include a screenshot in our project document
- Attempt to learn more SQL implementation with Flask

*Section 4:*

Agenda
- Tuesday - meet at class gather and talk to TA

- Wednesday - meet as a group to discuss weekly events
- Thursday - meet up again in class gather and talk to TA for updates.
- Friday - meet up as a group again to finish any assignments for the week.
